

# GEOSPATIAL MATURITY ASSESSMENT 2019

Oregon Report Card

Overall Grade: B+

COORDINATION	GRADE: A
<b>STATE-LED THEMES</b>	<b>GRADE</b>
Address	B+
Cadastre	A
Elevation	A+
Orthoimagery Leaf-Off	N/A
Transportation	A
<b>FEDERAL-LED THEMES</b>	<b>GRADE</b>
Geodetic Control	A
Government Units	D+
Hydrography	A-
Orthoimagery Leaf-On	A-

## METRICS:

A - Superior

C - Average

F - Failure

B - Above average

D - Below average

N/A - Not Applicable

The National States Geographic Information Council Geospatial Maturity Assessment provides NSGIC members and other partners with a summary of geospatial initiatives, capabilities, and issues within and across state governments. The NSGIC GMA now produces report cards for each state on central data themes and coordination topics. The assessment is performed every two years.

# OREGON GMA RESPONSE

We accept the Geospatial Maturity Assessment (GMA) as an adequate record of our current situation. We feel we are doing an adequate job in most areas, and exemplary job in some, and a few where we will strive to do better. In most cases, this will mean we need additional time or resources.

In particular, we want to respond to the grade in one area, that being Governmental Units. While we are making progress for this theme, we are not the official entity identified by the Census Bureau for their purposes. In addition, we do not have an identified steward for all governmental units, nor specifically identified funding for that theme. We have also identified over 100 governmental units that we track and are attempting to develop and maintain. Some of those are not included in the governmental units category for this assessment, but are a higher priority for us, so we have made progress on those data sets. That work doesn't count in the GMA.
