

Contact Information (Section 1 of 12)	
Name	
Mark Yacucci	
Agency/Organization Name	
Prairie Research Institute - Illinois State Geological Survey - University fo Illinois	
State	
Illinois	
Email Address	
yacucci@illinois.edu	
Coordination (Section 2 of 12)	
A. GIS Program Support	
1. Does your state have a GIO? (pick one)	
Other (specify)	
Please specify:	
State GIS Coordinator	
2. To whom does the GIO directly report? (pick one)	
Other state department or agency head	

	3. What abilities does the GIO have? (choose all that apply)
	<ul> <li>Input over technology used at the state enterprise level</li> <li>Other (specify)</li> </ul>
	Please specify:
	Assists with coordination of GIS within some state agencies
Е	3. Support for Coordination
	1. What authorization exists for the GIO/coordination position? (pick one)
	Statute
	2. How is the GIO office funded? (choose all that apply)
	• Other (specify)
	Please specify:
	Coordinator Position is General funds. There is no GIO office
	4. Does the GIO have a full-time professional staff that works on the ongoing programs of the office? (pick one)
	No
C	C. Implementation
	1. Does your state have a clearinghouse? (pick one)
	Yes
	2. Does your state have a strategic plan for GIS? (pick one)
	Yes, but more than 10 years old
	3. Does your state have an active GIS coordinating council that meets at least 4 times a year? (pick one)
	Yes, an unofficial but active council (could include state user group)

4	. Does the council have representation from all relevant stakeholders? (pick one)
Y	'es
D. U	JRL and Website Information
	1. Enter the complete URL for your State GIS Data Clearinghouse website. (Include http:// or https://)
h	https://clearinghouse.isgs.illinois.edu/
3	s. Enter the complete URL for your state's GIS Council website. (Include http:// or https://)
h	nttp://www.ilgisa.org
Next (	Generation 9-1-1 (NG9-1-1) (Section 3 of 12)
	s there an effort in your state to coordinate the development, normalization, aggregation, and/or distribution of ata in support of NG9-1-1? (pick one)
Yes	
	s there a state GIS coordinating body assigned with the responsibility for GIS data readiness for NG9-1-1?
Yes	
	s there a relationship between the state GIS office or coordinating body and state 9-1-1 coordinating body?
For	mal – GIS coordinating body is included in state 9-1-1 coordinating body
	s the development, normalization, aggregation, and/or distribution of GIS datasets required for NG9-1-1 ded? (pick one)
Yes	
	are there processes in place to normalize and aggregate authoritative GIS datasets required for NG9-1-1 to tewide datasets? (pick one)
5a. Puk	Is the designated aggregator public or private? (pick one)

5b. Do data sharing agreements exist with authoritative data providers to support statewide data aggregation? (pick one)
Yes
Road Centerlines
NENA
Site/Structure Address Points
NENA
PSAP Boundaries
NENA
Provisioning Boundaries
NENA
7. Do you have a consistent update cycle for ensuring that the statewide GIS datasets required for NG9-1-1 are as current as possible? (choose all that apply)
Road Centerlines
<ul><li>Site/Structure Address Points</li><li>PSAP Boundaries</li></ul>
Service Boundaries (law/fire/EMS)
Provisioning Boundaries
8. Please identify the data comparisons or assessments that you apply to your data: (choose all that apply)
Comparison between GIS data and MSAG/ALI data
Boundaries checked for unintended gaps and overlaps
<ul> <li>Minimum required attributes are present and compliant with NENA standard</li> <li>Address Points to Road Centerlines</li> </ul>
Road Centerlines (enter %)
25-49%

	Site/Structure Address Points (enter %)
	25-49%
	PSAP Boundaries (enter %)
	25-49%
	Service Boundaries - Law Enforcement (enter %)
	25-49%
	Service Boundaries - Fire (enter %)
	25-49%
	Service Boundaries - EMS (enter %)
	25-49%
	11. Are 9-1-1 calls in your state being spatially routed to the PSAP over an ESInet using Next Generation Core
	Services (NGCS) and the Emergency Call Routing Function (ECRF)? (pick one)
	No
	40.7
	12. Is there any inter-state NG9-1-1 GIS coordination (ex: boundaries alignment)? (pick one)
	No
F	Elections (Section 4 of 12)
•	
S	1. Does your office have a formal relationship (statute, administrative rule, formal agreement for services, or a tanding coordination meeting) with your State's Election Director? (pick one)
	No
	2. Does your state manage or have easy access to an accurate, current statewide voting precinct boundary layer
	(pick one) (Please note, that accuracy in this question means two things. First, accuracy indicates that the layer
	contains all of the most recent precinct boundary polygons. Second, accuracy also means that all the layers of information needed to do any election data management are in the right projection and at the appropriate scale.)
	No

	3. Does your state use and maintain a state or commercial geocoding web service to locate voter addresses and voters? (pick one)
	Yes
	If so, which statement best describes how the geocoding web services are used? (pick one)
	Geographic coordinates for addresses are routinely analyzed and updated selectively as needed
	4. Does your state have an audit process for precinct assignments within its election database? (pick one) No
	Address data creation and maintenance (pick one)  No
	District data creation and maintenance (pick one) Yes
	Precinct data creation and maintenance (pick one) Yes
	Civic boundary data creation and maintenance (pick one)  No
	6. Will the new precinct boundaries be added to your state's clearinghouse after the 2021 redistricting process? (pick one)
	No
4	ddress Points (Section 5 of 12)
ŗ	1. Does your state have a program for developing or maintaining an authoritative statewide address database? pick one)
	No
3	adastre/Parcels (Section 6 of 12)

	A. Parcel Data
	1. What percentage of your counties have georeferenced digital parcel maps? (pick one)
	90-100%
	2. Does your state have a program of collecting current digital parcel data from local jurisdictions? (pick one)
	No
	C. No centralized state collection of digital parcel data
	1. What percentage of your counties make their data available free or at a nominal cost? (pick one)
	50-79%
٦	Transportation (Section 7 of 12)
	1. How complete is your state's road centerline database? (pick one)
	51-85%
	2. How frequently is this data updated? (pick one)
	Not defined
	2. What is the graphity of the atotal level date 2 (siel, and)
	3. What is the quality of the state-level data? (pick one)  Published to a nonstate or national standard
	rubiisiied to a nonstate or national standard
	4. How accessible is your road centerline database? (pick one)
	Formal Request - distributed media or downloadable
	5. Identify the characteristics of your road centerline database. (choose all that apply)
	Steward: There is a designated aggregator or steward for this data layer
	<ul> <li>Attributes: The state data does contain attributes associated with road centerlines (e.g. lanes, speeds address ranges)</li> </ul>
H	Hydrography (Section 8 of 12)

	1. Is NHD meeting your state's requirements for hydrography? If yes, the grade cannot be lower than C. If no, the grade can rise or decline. (pick one)
	Yes
	2. Choose the answer that best describes the status of your state's program/initiative to improve your hydro dataset. (pick one)
	No program
	3. Are you actively working on an improved NHD hydro dataset? And if so, how much has your state completed? (pick one)
	Have not actively begun
	6. How accessible is your state's hydrography database? (pick one)
	Open, free, downloadable
	7. Does your state have a Data Steward for hydrography and are they actively engaged with USGS and with stakeholders in your state to make updates to the current NHD? (pick one)
	Yes
	8. Identify the best practices characteristics of your hydrography database. (choose all that apply)
	<ul> <li>Attributes: The state data does contain attributes associated with hydrography (e.g. lake names, stream and river names, coding for all feature types)</li> </ul>
0	rthoimagery (Section 9 of 12)
A	. Leaf-On
	1. How much of your state is covered by leaf-on orthoimagery? (pick one)
	90-100%
	2. Please indicate its update frequency. (pick one)
	Every 2-3 years
	4. Please indicate its accessibility. (pick one)
	Findable and downloadable

5. Identify the characteristics of your leaf-on orthoimagery database. (choose all that apply)
Steward. There is a designated aggregator or steward for this data layer
B. Leaf-Off
1. How much of your state is covered by leaf-off orthoimagery? (pick one)
90-100%
2. Please indicate its update frequency. (pick one)
No update
4. Please indicate its accessibility. (pick one)
Findable and downloadable
5. Does your program collect more than the three R-G-B bands of data? (pick one)
No
6. Identify the characteristics of your orthoimagery database. (choose all that apply)
Steward. There is a designated aggregator or steward for this data layer
Accessibility: The data are freely available to the public as a service
Governmental Units (Section 10 of 12)
1. Does your state have >75% unincorporated areas (as measured by the number of county subdivisions, not by land mass)? (pick one)
No
2. Of your incorporated areas, what percentage have reliable boundaries? (pick one)
76-99%
3. Does your state have an authoritative source for boundary data? (pick one)
No

	4. What is the update frequency of the data? (pick one)
	Infrequent because of annual reporting expectation for the Census
	5. How are the data published? (pick one)
	Data published with no standard
	6. Are the data publicly available? (pick one)
	Downloadable
	7. Identify the characteristics of your governmental boundaries activities. (choose all that apply)
	None apply
C	Geodetic Control (Section 11 of 12)
	1. Does your state have any program activities focused on geodetic control? (pick one)
	Yes
	2. Is your state included in the Public Land Survey System (PLSS)? (pick one)
	Yes
	3. What specific program activities exist? (choose all that apply)
	Nominate new control points to NSRS
	<ul> <li>Support a statewide CORS network (possibly through private partners)</li> <li>Support a statewide RTN network (possibly through private partners)</li> </ul>
	<ul> <li>Program for performing GPS on Benchmarks</li> </ul>
	Works with counties to tie their survey corners to NSRS
	4. What are the details of your state efforts? (choose all that apply)
	Steward: There is a designated state steward
	Funding: There is a regular funding for the state program
	<ul> <li>Current Business Plan: The state has a current geodetic control business plan that is less than three years old</li> </ul>
	<ul> <li>Relationship: There is an established working relationship between the state and the professional surveying community</li> </ul>

	5. How is your state preparing for NGS's 2022 vertical datum and terrestrial reference frames update? (NSRS Modernization)
	Legislation is in progress
Е	Elevation (Section 12 of 12)
	1. Indicate the level of completion of the elevation data layer as a percentage. (pick one)
	90-100%
	2. What is the frequency of the updates? (pick one)
	8 years or sooner statewide
	3. What standards are used for publishing state-collected data? (pick one)
	Published to a standard (verified via QA)
	4. What is the quality level of the elevation database? (pick one)
	QL3 or better as defined by USGS
	5. Do you have any data within your state that is a better Quality Level than is stated in the previous question? (pick one)
	Yes
	6. How accessible is your elevation database? (pick one)
	Open, free, viewable, downloadable, with API
	7. What are the details of your state efforts? (choose all that apply)
	Steward: There is a designated state steward
	Funding: There is regular funding for the state program
	Business plan: The state has a business plan for elevation data
	• Formal relationship: There are formal relationships between the state and local government

- 8. How does your state use elevation data? (choose all that apply)
- Engineering (Transportation/Construction Planning)
- Archeology
- Renewable Energy Design (Solar/Wind)
- Environmental
- Property Valuation
- 3D Visualizations and project design
- Drainage and Stormwater modeling
- Flood impact studies
- Watershed and Wetland delineation
- Basemap enrichment building footprints, etc.
- Hazard Prediction landslide evaluation
- Elevation referencing Orthophotography/3D data enrichment
- Habitat and vegetation studies
- Karst topography studies
