

Contact Information (Section 1 of 12)

Name

Richard Wade

A. GIS Program Support

	Agency/Organization Name Texas Natural Resources Information System
	State Texas
	Email Address Richard.Wade@twdb.texas.gov
C	Coordination (Section 2 of 12)

1. Does your state have a GIO? (pick one)

Other state department or agency head

2. To whom does the GIO directly report? (pick one)

Yes - official state-level GIO

	3. What abilities does the GIO have? (choose all that apply)
	 Influence on state and federal policy issues affecting the GIS community
	Input to budget and financial matters affecting the state GIS office Input to budget and financial matters affecting the state GIS office Input to budget and financial matters affecting the state of the
	 Input over technology used at the state enterprise level Control over state-wide GIS data standards
	 Coordinate activities across levels of government and within state government
	Influence resides more with the Council than the GIO
Е	3. Support for Coordination
	1. What authorization exists for the GIO/coordination position? (pick one)
	Statute
	2. How is the GIO office funded? (choose all that apply)
	General funds
	3. Is the GIO office able to accept "soft" money such as grants, fees for service, etc.? (pick one)
	Yes
	4. Does the GIO have a full-time professional staff that works on the ongoing programs of the office? (pick one)
	Yes
C	. Implementation
	1. Does your state have a clearinghouse? (pick one)

С

Yes

2. Does your state have a strategic plan for GIS? (pick one)

Yes, but more than 10 years old

3. Does your state have an active GIS coordinating council that meets at least 4 times a year? (pick one)

Yes, an unofficial but active council (could include state user group)

	4. Does the council have representation from all relevant stakeholders? (pick one)
	Yes
	D. URL and Website Information
	1. Enter the complete URL for your State GIS Data Clearinghouse website. (Include http:// or https://)
	https://data.tnris.org
	2. Enter the complete URL for your State's GIO office website. (Include http:// or https://)
	https://tnris.org/geographic-information-office/
	3. Enter the complete URL for your state's GIS Council website. (Include http:// or https://) N/A
	4. Any new legislation? If so, please provide a very brief description and a full URL for any newly enacted GIS-related statutes in your state. These can include the establishment of the coordination office, sustained funding sources, public record laws, or other relevant laws.
	No new legislation since 2011
Ne	ext Generation 9-1-1 (NG9-1-1) (Section 3 of 12)
	1. Is there an effort in your state to coordinate the development, normalization, aggregation, and/or distribution of S data in support of NG9-1-1? (pick one)
	Yes, but the effort is led by counties
	2. Is there a state GIS coordinating body assigned with the responsibility for GIS data readiness for NG9-1-1? (pick one)
	No
	3. Is there a relationship between the state GIS office or coordinating body and state 9-1-1 coordinating body? (pick one)
	Informal – some contact with state 9-1-1 coordinating body, but GIS coordinating body isn't an active participant

4. Is the development, normalization, aggregation, and/or distribution of GIS datasets required for NG9-1-1 funded? (pick one)
Some funding is available but not enough to cover all needs
5. Are there processes in place to normalize and aggregate authoritative GIS datasets required for NG9-1-1 to statewide datasets? (pick one)
Yes
5a. Is the designated aggregator public or private? (pick one)
Public/private partnership
5b. Do data sharing agreements exist with authoritative data providers to support statewide data aggregation? (pick one)
Data sharing agreements are unnecessary
Road Centerlines
State
Site/Structure Address Points
State
PSAP Boundaries
State
7. Do you have a consistent update cycle for ensuring that the statewide GIS datasets required for NG9-1-1 are as current as possible? (choose all that apply)
Road Centerlines
Site/Structure Address Points
PSAP Boundaries
Service Boundaries (law/fire/EMS)
Provisioning Boundaries

8. Please identify the data comparisons or assessments that you apply to your data: (choose all that apply)
Comparison between GIS data and MSAG/ALI data
Boundaries checked for unintended gaps and overlaps
Minimum required attributes are present and compliant with NENA standard
Address Points to Road Centerlines
Road Centerlines (enter %)
90-100%
Site/Structure Address Points (enter %)
80-89%
PSAP Boundaries (enter %)
80-89%
Service Boundaries - Law Enforcement (enter %)
80-89%
Service Boundaries - Fire (enter %)
80-89%
Service Boundaries - EMS (enter %)
80-89%

10. Which of the following statewide GIS datasets are publicly available? (choose all that apply)

- Road Centerlines
- Site/Structure Address Points
- PSAP Boundaries
- Service Boundaries (law/fire/EMS)
- Provisioning Boundaries

11. Are 9-1-1 calls in your state being spatially routed to the PSAP over an ESInet using Next Generation Services (NGCS) and the Emergency Call Routing Function (ECRF)? (pick one)	on Core
Yes, but not statewide (regionally, or only some PSAPs)	
12. Is there any inter-state NG9-1-1 GIS coordination (ex: boundaries alignment)? (pick one)	
Yes (Specify)	
Please describe:	
In an effort to have a seamless map with no gaps or overlaps, it is necessary for 9-1-1 entities to with neighboring jurisdictions to resolve GIS issues. While there is coordination, it is informal a monitored by the state.	
Elections (Section 4 of 12)	
1. Does your office have a formal relationship (statute, administrative rule, formal agreement for servi standing coordination meeting) with your State's Election Director? (pick one)	ces, or a
No	
2. Does your state manage or have easy access to an accurate, current statewide voting precinct bound (pick one) (Please note, that accuracy in this question means two things. First, accuracy indicates that to contains all of the most recent precinct boundary polygons. Second, accuracy also means that all the lainformation needed to do any election data management are in the right projection and at the appropriates.	the layer ayers of
If so, which statement best describes the precinct boundaries layer? (pick one)	
The precinct boundaries are updated as changes are made	
3. Does your state use and maintain a state or commercial geocoding web service to locate voter addre voters? (pick one)	esses and
No	
4. Does your state have an audit process for precinct assignments within its election database? (pick or No	ne)

Address data creation and maintenance (pick one)
No
District data creation and maintenance (pick one)
Yes
Precinct data creation and maintenance (pick one)
Yes
Tes
Civic boundary data creation and maintenance (pick one)
No
6. Will the new precinct boundaries be added to your state's clearinghouse after the 2021 redistricting process? (pick one)
No
ddress Points (Section 5 of 12)
1. Dono versus otata harra a marguana fan da ralaming an mariataining an arribanitativa atatarriida addusaa datahaa 2
1. Does your state have a program for developing or maintaining an authoritative statewide address database? pick one)
pick one)
pick one)
Yes
Yes 2. What percent of local address-authorities contribute to your state's address point database? (pick one) 90-100%
Yes 2. What percent of local address-authorities contribute to your state's address point database? (pick one) 90-100% 3. How frequently is this data updated? (pick one)
Yes 2. What percent of local address-authorities contribute to your state's address point database? (pick one) 90-100%
Yes 2. What percent of local address-authorities contribute to your state's address point database? (pick one) 90-100% 3. How frequently is this data updated? (pick one) Annually
Yes 2. What percent of local address-authorities contribute to your state's address point database? (pick one) 90-100% 3. How frequently is this data updated? (pick one) Annually 4. What is the quality of the state-level data? (pick one)
Yes 2. What percent of local address-authorities contribute to your state's address point database? (pick one) 90-100% 3. How frequently is this data updated? (pick one) Annually
Yes 2. What percent of local address-authorities contribute to your state's address point database? (pick one) 90-100% 3. How frequently is this data updated? (pick one) Annually 4. What is the quality of the state-level data? (pick one) Published to the NENA GIS Data Model (Site/Structure Address Points) or a state-level standard that can

5. How widely available is your address point database? (choose all that apply)
Available for download
Available via API (e.g., map service, feature service)
6. Is your address point data used to support the following? (choose all that apply)
Used as reference data for a geocoder web service
7. Identify the characteristics of your address point database. (choose all that apply)
Steward: There is a designated aggregator or steward for this data layer
Funding: This program has regular state-level funding
 Attributes: The state data contains attributes associated with address points; e.g. address including sub-units, land use (e.g. home, park), and nature of point (e.g. parcel centroid, front door of structure driveway access point)
Cadastre/Parcels (Section 6 of 12)
A. Parcel Data
1. What percentage of your counties have georeferenced digital parcel maps? (pick one)
90-100%
2. Does your state have a program of collecting current digital parcel data from local jurisdictions? (pick one)
Yes
B. Centralized state collection of digital parcel data
1. What percentage of your counties participate? (pick one)
80-89%
2. What standard is maintained for the central database? (pick one)
Published and adheres to a standard verified via QA/QC
3. How accessible is data from this central database? (choose all that apply)
Open, free, viewable, downloadable, with API

- 4. What are the characteristics of your state parcel program? (choose all that apply)
- Steward: There is a designated state steward
- Funding: There is regular funding for the state program
- Formal relationship: There are formal relationships between the state and local government
- Attributes: The state data includes parcel ID, address, owner name, and other attributes normally associated with parcels and assessment values

Transportation (Section 7 of 12	Transportation	(Section	7 of 13	2)
---------------------------------	----------------	----------	---------	----

1. How complete is your state's road cent	terline database? (pick one)
---	------------------------------

86-99%

2. How frequently is this data updated? (pick one)

Weekly, nightly, or near real-time

3. What is the quality of the state-level data? (pick one)

Published to a nonstate or national standard

4. How accessible is your road centerline database? (pick one)

Open, free, viewable, downloadable, with API

- 5. Identify the characteristics of your road centerline database. (choose all that apply)
- Steward: There is a designated aggregator or steward for this data layer
- Local government: A formal connection or agreement exists with local government to roll up and make data available to the state
- Attributes: The state data does contain attributes associated with road centerlines (e.g. lanes, speeds, address ranges)

Hydrography (Section 8 of 12)

1. Is NHD meeting your state's	requirements for hyd	drography? If yes,	the grade cannot b	e lower than C.	If no, the
grade can rise or decline. (pick one	·)				

Yes

2. Choose the answer that best describes the status of your state's program/initiative to improve your hydro dataset. (pick one)
In the planning phases
3. Are you actively working on an improved NHD hydro dataset? And if so, how much has your state completed? (pick one)
Have not actively begun
4. If you are actively working on an improved hydro dataset, how frequently is it being maintained? (pick one)
Not being maintained regularly at this point
5. When you are actively working on an improved hydro dataset, do you coordinate with USGS so your updates will integrate with the NHD? (pick one)
Yes
6. How accessible is your state's hydrography database? (pick one)
Open, free, downloadable
7. Does your state have a Data Steward for hydrography and are they actively engaged with USGS and with stakeholders in your state to make updates to the current NHD? (pick one)
We have a steward designated but not actively engaged with USGS or stakeholders
8. Identify the best practices characteristics of your hydrography database. (choose all that apply)
 Attributes: The state data does contain attributes associated with hydrography (e.g. lake names, stream and river names, coding for all feature types)
Orthoimagery (Section 9 of 12)
A. Leaf-On
1. How much of your state is covered by leaf-on orthoimagery? (pick one)
90-100%
2. Please indicate its update frequency. (pick one)
Every 2-3 years

3. Please indicate if you opt for any additional options. (choose all that apply)
Other (specify)
Please specify:
6-inch, statwide through the Hexagon Imagery Content Program
4. Please indicate its accessibility. (pick one)
Findable and downloadable
5. Identify the characteristics of your leaf-on orthoimagery database. (choose all that apply)
• Steward. There is a designated aggregator or steward for this data layer
 Funding. This program has regular state-level funding for buy-ups
Local government. There are some formal connections with the local government on buy-ups
B. Leaf-Off
1. How much of your state is covered by leaf-off orthoimagery? (pick one)
90-100%
2. Please indicate its update frequency. (pick one)
Update cycle longer than 8 years
3. Please indicate if you opt for any additional options. (choose all that apply)
6-inch product or better
4. Please indicate its accessibility. (pick one)
Findable and downloadable
5. Does your program collect more than the three R-G-B bands of data? (pick one)
Yes (Specify)
Please specify:
plus Near Infrared

	6. Identify the characteristics of your orthoimagery database. (choose all that apply)
	Steward. There is a designated aggregator or steward for this data layer
	 Funding. This program has regular state-level funding
	• Accessibility: The data are freely available to the public as a service
C	Governmental Units (Section 10 of 12)
l	1. Does your state have >75% unincorporated areas (as measured by the number of county subdivisions, not by and mass)? (pick one)
	Yes
	2. Of your incorporated areas, what percentage have reliable boundaries? (pick one)
	26-50%
	3. Does your state have an authoritative source for boundary data? (pick one)
	No
	4. What is the update frequency of the data? (pick one)
	Infrequent because of annual reporting expectation for the Census
	5. How are the data published? (pick one)
	Data published with no standard
	6. Are the data publicly available? (pick one)
	Downloadable
	7. Identify the characteristics of your governmental boundaries activities. (choose all that apply)
	None apply
C	Geodetic Control (Section 11 of 12)
	1. Does your state have any program activities focused on geodetic control? (pick one)
	Yes

	2. Is your state included in the Public Land Survey System (PLSS)? (pick one)		
	No		
	3. What specific program activities exist? (choose all that apply)		
	Support a statewide CORS network (possibly through private partners)		
	• Support a statewide RTN network (possibly through private partners)		
	Program for performing GPS on Benchmarks		
	4. What are the details of your state efforts? (choose all that apply)		
	Steward: There is a designated state steward		
	Funding: There is a regular funding for the state program		
	 Relationship: There is an established working relationship between the state and tribal – local governments 		
	 Relationship: There is an established working relationship between the state and the professional surveying community 		
	5. How is your state preparing for NGS's 2022 vertical datum and terrestrial reference frames update? (NSRS Modernization)		
	Legislation passed (future proof)		
Elevation (Section 12 of 12)			
	1. Indicate the level of completion of the elevation data layer as a percentage. (pick one)		
	90-100%		
	2. What is the frequency of the updates? (pick one)		
	8 years or sooner statewide		
	3. What standards are used for publishing state-collected data? (pick one)		
	Published to a standard (verified via QA)		
	4. What is the quality level of the elevation database? (pick one)		
	Quality Level 2 (QL2) or better as defined by USGS		

5. Do you have any data within your state that is a better Quality Level than is stated in the previous question? (pick one)

Yes

6. How accessible is your elevation database? (pick one)

Open, free, downloadable

- 7. What are the details of your state efforts? (choose all that apply)
- Steward: There is a designated state steward
- Funding: There is regular funding for the state program
- 8. How does your state use elevation data? (choose all that apply)
- Engineering (Transportation/Construction Planning)
- Archeology
- Renewable Energy Design (Solar/Wind)
- Environmental
- Flood impact studies
- Watershed and Wetland delineation
- Basemap enrichment building footprints, etc.
- Hazard Prediction landslide evaluation
- Elevation referencing Orthophotography/3D data enrichment
- Habitat and vegetation studies
- Karst topography studies

Please describe (in numbers and scope) how the GIS community and others in your state have leveraged lidar/elevation data in support of a variety of disciplines (e.g. transportation planning, flood risk mitigation, environmental management, etc.).
