The National States Geographic Information Council Geospatial Maturity Assessment provides NSGIC members and other partners with a summary of geospatial initiatives, capabilities, and issues within and across state governments. The NSGIC GMA now produce report cards for each state on central data themes and coordination topics. The assessment is performed every two years.

NEW YORK GMA RESPONSE

New York's grades in the Geospatial Maturity Assessment generally reflect the investment in and the maturity of the state's framework data programs, many of which have been in existence for nearly two decades. These grades are a tribute to the incredibly dedicated team at the NYS GIS Program Office.

The New York scores reflect the relative priority the GIS Program Office puts on each theme. These priorities are set using feedback from the entire GIS stakeholder community represented by the New York State Geospatial Advisory Council. For example, leaf-off orthoimagery is prioritized higher than leaf-on by the Council.

Publicly available GIS data and web services are key to scaling the impact of the investments New York makes in these framework data. This year, the web services authored by the GIS Program Office will answer over 800,000,000 requests.
