National States Geographic Information Council

Orientation

2018 Midyear Meeting / Salt Lake City, Utah

Keep in mind...

- People are what make NSGIC work and our most valuable asset
- Sponsors are our partners – they enable this organization to be successful
- The Annual Conference and Midyear Meeting are excellent networking opportunities
- Committees are essential for carrying out our work and where many of our ideas are formed
- Member Services Committee is here to help you
- We are a small group with a big presence in our advocacy efforts

NSGIC People: Presidents

Andy Rowan (NJ)
President

Dan Ross (MN)
President- Elect

Bert Granberg (UT)
Past President

NSGIC People: Board of Directors

Cheryl Benjamin (NY)

Anne Johnson (AK)

Susan Miller (GA)

Karen Rogers (WY)

Jim Steil (MS)

Tony Spicci (MO)

NSGIC People: Officers

Richard Wade (TX)
Secretary

Phillip Henderson (AL)
Treasurer

NSGIC People: Staff

Molly Schar
Executive Director

Jamie Chesser
Geospatial Programs
Manager

Michelle Jones
Manager, Membership
& Meetings

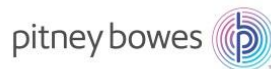

Bronwyn Walls
Communications
Coordinator

Committees

- Addresses & Transportation
- Conferences
- Corporate Leadership (CLC)
- Elections
- Finance
- Geospatial Preparedness
- GIS Inventory
- Member Services
- Next Generation 9-1-1
- Resiliency Task Force
- Sponsorship

Sponsors

Advocacy: Legislative Priorities

- Geospatial Data Act
- Digital Coast Act
- Elevation Data
- National Address Database
- Preparing for Next Generation 9-1-1
- Model State Legislation
- GIS & Land Surveyors Requirements for Licensing

Meetings

- Annual Conference - fall
- Midyear Meeting - early spring
- Virtual State Caucus - winter and summer
- Committee Meetings - year-round
- Board Meetings - monthly

MemberClicks Online Platform

- Responsive design and curated content
- Integrated database
- Online community
 - Private for members and registered users
 - Make connections - like friending on Facebook
 - Your profile to share updates and photos

** Stop by the event desk Tuesday or Wednesday and let Bronwyn and Michelle help you with any questions on MemberClicks, setting up your profile or for a quick tutorial on accessing the online discussion forums. **

State-Led Sharing of Best Practices

Making Critical Connections

Geospatial Awareness and Advocacy

NSGIC promotes the efficient development and management of location-based information resources, and advocates for innovative, strategic use of these assets to advance the interests of states, tribes, regions, local governments and the nation.

For more than 25 years, NSGIC has boosted national geospatial policy and provided a forum for best practices exchange and collaboration. Our members lead the way in the creation of intelligent maps and databases that equip public and private leaders to make more informed and timely decisions.

NSGIC's membership is comprised of senior state geographic information systems executives and coordinators, federal agency representatives, local government officials, private sector solutions providers, academic researchers and GIS colleagues at partner organizations.

Enhancing the Arizona Address Data Management Ecosystem: Midyear Meeting Presentation Highlight

By [Jenna Straface](#) | February 8, 2018

This week we are highlighting a presentation titled "Enhancing the Arizona Address Data Management Ecosystem," presented by [Jenna Straface](#), [Gene Trobia](#), [Bo Guo](#), and [Howard Ward](#) on Tuesday, February 27. Read Jenna's presentation description below for a preview of the discussion content:

As one of the two original pilot states for the National Address Database (NAD) project, Arizona continues to build a statewide address management ecosystem. Key success factors include support of the Arizona Geographic Information Council (AGIC) and the Arizona State Land Department (ASLD), active state and local government collaboration, strategic public and private partnerships, participation in NSGIC's Address & Transportation Committee's identification of national guidelines and best practices, and the adoption of new technology to improve data workflows and validate authoritative addresses.

The presenters will provide a brief overview of the Arizona Address Management Ecosystem and discuss several of its key components.

Montana is one of the states that has had addresses rejected from the NAD due to missing zip codes. So, I really like Cheryl's version of Option 3 where the USPS is providing the missing zip codes. I know some local governments struggle with the zip codes, so I would think this would be a selling point for them to sharing their data, or sharing it more frequently than they currently are.

Until very recently, the USPS has not participated in the NAD since the Address Summit that was held in 2015. In December of 2017, USPS assigned a staff person to evaluate the NAD. I provided them with what was available at the time, 17 states + DC, which represented about 42 million records. Earlier this month, USPS reported back that they easily validated 37 million records. They are still analyzing the remaining 5 million records to determine why they don't exist in the USPS files, but I suspect that the majority are addresses to which no mail is delivered.

This recent interest from USPS is encouraging, but I'm not sure that they would agree to validate missing ZIP codes. I'll ask, but I'm not optimistic at this point.
